Description

Core-Screener – the latest technology product which proves to be one of the best anti-leakage agent for the exterior of the building. Since there was no suitable anti-leakage agent for building's exterior, it was a serious problem before the invention of Core-Screener.

Core-Screener can be sprayed on the surface of tiles in the exterior of building. The exterior will be covered by an invisible film which can prevent water from seeping into the gap between tiles. Core-Screener can also be used as the primer for concrete surface painting and can prevent the peeling off of emulsion paint or other paints.

Product Features

- *Anti-UV*
- *Unlimited impermeability and adhesion*
- *Water based*
- *High viscosity*
- *Short drying period*
- *Usable on wet circumstances*
- *Non-toxic, not contain Formaldehyde and Xylene*

Application

1. *Outside wall of building.*
2. *Inside wall or tile of building.*
3. *Timber.*
4. *Paper.*
5. *Steel.*

Processing Methods

1. *Remove all loose particles, dust, grease and other contaminants from substrate surface or insulation tile.*
2. *Shake the bottle well before use.*
3. *Apply evenly onto substrate surface by brush, or roller. 1kg of Core-Screener approximately 6m² area.*

Product Data

- Appearance: Clear
- Cure Time: 15 minutes for preliminary,
2 hours for permanency
- Coating: Thin layer
- Coverage: 1kg for 6.5 M² under normal
situation
- Storage Time: 1 years unpacked

透明金剛

膠 膜 防 漏 劑

透明金剛是高新技術產品，是迄今面世最理想的外牆薄膜防漏劑。

透明金剛可以噴塗在大廈外牆紙皮石、磁磚面，完全透明，不損外貌；但外牆表面却復蓋一層令人難以察覺的膠膜，令水分子無法滲入紙皮石、磁磚接縫位，長遠而徹底起到防漏作用。

事實上，外牆滲水是極難解決的難題，因市面上沒有適合外牆使用的防漏劑。現在，透明金剛已經面世，可以輕而易舉地解決這一難題了。

透明金剛亦可以作為底漆直接噴塗在混凝土表面，然後再噴乳膠漆或其他油漆，這樣，你的乳膠漆或油漆便不容易剝落。

產品特性： 抗紫外線、抗冷縮熱漲。
快速固化。
不會變黃、不會撕裂、不會剝落。
不含二甲苯、甲醛等毒素。
出色的黏固力。
極簡單而方便的施工方式。

適用範圍： 紙皮石、磁磚接縫位防漏
窗旁週邊防漏
混凝土牆防漏。

使用方法： 以機械噴塗的方式施工，均勻噴於物件，小面積可用手提噴壺施工。

5 - 10 分鐘固化，每公斤透明金剛可復蓋 5 平方米左右。

注意：

1. 請戴保護眼罩施工
2. 遠離煙火
